### INSULATED RUBBER BLANKET

Intended to protect linemen from accidents, when in touch with energized parts of structures, during live line maintenance.

They are versatile and permit linemen to cover typical irregular shaped components, such as: load-break switches, secondary racks, pin insulators, cold end strings, crossarms etc.

Made from special ozone and corona resistant rubber material, guaranteeing excellent properties in accordance with ASTM D-1048/05 Standard.

These blankets are made bright orange, type II (resistant to ozone effects). They are available in three models, for a wider number of applications: Solid Type, Slotted Type and Three-slot Type.
