

MEGGER MIT300 series

MIT 310

- ♦Extremely easy to use
- ♦Tough rubber armoured case
- ♦Self contained protective cover
- ♦Live circuit warning
- ♦Weatherproof to IP54
- ♦Intelligent Safety System for protection.
- ♦Result storage and downloading
- ♦Download software included
- ♦USB Interface

SPECIFICATIONS

Insulation Ranges Nominal
Test Voltage
MIT310, 310A, 320, 330: 1000 V, 500 V,
250 V (d.c.)
MIT300: 500 V, 250 V (d.c.)

DESCRIPTION

The Megger MIT300 series features:

Digital or Analogue: The Megger MIT300, MIT310 and MIT320 all feature the popular Megger digital/analogue display. Large 20mm high characters provide very clear readout, combined with an analogue arc for the feel of an analogue instrument, with a true analogue response.

The Megger MIT310A has a moving coil display for those who prefer a real moving needle. Black decals on a white background give high contrast, even in poor light conditions.

MEGGER MIT300 series

MIT300 SERIES BENEFITS	MIT300	MIT310	MIT310A Analogue	MIT320	MIT330
Insulation testing					
250 V	■	■	■	■	■
500 V	■	■	■	■	■
1000 V		■	■	■	■
Test range	999 MS2	999 MS2	999 MS2	999 MS2	999
Insulation limit alarm (0.01 MS2 to 999 MS2)				■	■
Continuity testing					
Continuity to 100 S2	■	■	■	■	■
Continuity buzzer	■	■	■	■	■
Lead null to 9ohms	■	■	0.5 S2	■	■
Adjustable buzzer 1 to 20 S2				■	■
Audible buzzer disable				■	■
Voltage measurement					
Volts AC/DC		600 V	600 V	600 V	600 V
Resistance measurement					
10 S2 to 1 MS2 range				■	■
Features					
Voltage warning	■				
Default voltmeter		■	■	■	■
Backlit display				■	■
Backlight selector ranges				■	■
Locking test button	■	■	■	■	■
Auto powerdown	■	■		■	■
Switched test probe				■	■
IP54 weatherproof	■	■	■	■	■
Accepts rechargeable batteries	■	■	■	■	■
1000 Test result storage					■
Downloading					■
Calibration certificate	■	■		■	■
3 years warranty	■	■		■	■
